## Welcome!

Founded in 1992, Intelligent Solutions, Inc. provides data management consulting, education, and literature to business and government organizations worldwide.

You may have heard our experts speak at industry conferences, or read our books, articles, or white papers.

ISI specializes in business intelligence and customer analytics, and in the systems required to enable and support them.

Using our Corporate Information Factory (CIF) architecture and methodology as a baseline, we assist our clients in justifying, planning, implementing, and assessing their data warehouse, operational data store, and data mart systems.

Thank you for visiting our site. We invite you to browse and benefit from it.
